

Cloud PBX

Improving Your Business Communications

A future-proof communications solution that brings businesses into the digital age. Seamless communication between your people and customers allows your business to evolve and boost productivity.

Communicate quickly, wherever you're working

Cloud Telephony means you and your people are contactable from any device, at any location. From phones to mobile devices and web browsers, staying in touch on the move is easy. This means you can speed up your communications, react to new opportunities faster and generate higher revenues.

Connect remote and home workers cost-effectively

With our solution, Cloud PBX your people can access enterprise-class communications features from their mobile device or PC, which saves you spending money on additional desk phones.

Cloud PBX – Reliable communications, collaborative teams

Cloud PBX allows you to break the chains of traditional communications solutions. With one number and one inbox, employees can stay in contact and work more productively.

Overcome communication challenges and maximise your success

We'll provide you with help, training and advice from our expert Partner teams, to get you up and running with our hosted voice solution to your customers.

Improving your Business Communications with Cloud PBX

Simple

Intuitive access to powerful voice features, one login and password and a dedicated phone number for reaching colleagues at a time that suits you.

Usable

On any device from anywhere in the world, including the mobile app designed to make business communication professional and hassle-free.

Reliable

Fully redundant architecture (including geo-redundant EU data centres) end-to-end data security and voice services that are designed and managed in-house.

Ultimate Flexibility with the Cloud PBX Mobile App

Using the latest technologies the Cloud PBX App integrates your user settings giving you the power to stay in touch professionally and efficiently. All your private and corporate address books are stored in one handy location, and with call forwarding and conferencing enabled you and your people will be more flexible than ever before.
